

DATABASE ADMINISTRATOR (DBA) JOB DESCRIPTION

COMPANY: CORE SOLUTIONS, INC.
LOCATION: WAYNE, PA
WEB SITE: www.coresolutionsinc.com

Core Solutions (CORE), headquartered in Wayne, Pennsylvania, is an emerging leader in providing Electronic Health Records solutions to the behavioral healthcare/human services industries, a \$135 Billion market. CORE's innovative technology platform has transformed its client businesses allowing them to save over \$21 Million annually, and achieve a 98% acceptance rate in their claims processing. CORE believes the key to successful implementation of EHR solutions is aligning people and process with technology. Apart from offering a strong technology platform, CORE's professional services team helps customers realign processes to take advantage of new technologies. The results are improved quality of care and increased financial performance.

CORE is seeking a highly qualified Database Administrator to perform a lead role in managing the development and support of enterprise databases that support our applications. The selected DBA must ensure the optimal performance and security of all production databases, advice management of potential risks and mitigations and proactively take steps to ensure smooth performance.

DBA Job Responsibilities include:

- Responsible for ensuring availability and performance of the databases that support the system.
- Work to ensure that the associated hardware resources allocated to the databases and to ensure high resilience and performance tuning.
- To proactively monitor the database systems to ensure secure services with minimum downtime (SQL Server 2005/2008).
- Responsible for providing trend analysis to management team to enable them to make informed decisions regarding resource management.
- Responsible for troubleshooting and problem solving of SQL development.
- Responsible for improvement and maintenance of the databases to include rollout and upgrades.
- Responsible for implementation and release of database changes according to agreed timescales and costs.
- All other responsibilities as assigned

Skills / Attributes Required

- In depth SQL Server Database Administration experience.

- Experience of managing multiple MS SQL 2000 & 2005 RDBMS on large systems
- Strong self-sufficiency and initiative working on Database projects
- Practical experience in monitoring and tuning a database to provide a high availability service.
- Experience of Transactional SQL, and DTS stored procedures.
- Practical experience in managing the internal and external MS SQL database security
