

## SENIOR .NET DEVELOPER JOB DESCRIPTION

**COMPANY:** CORE SOLUTIONS, INC.  
**LOCATION:** WAYNE, PA  
**WEB SITE:** [www.coresolutionsinc.com](http://www.coresolutionsinc.com)

---

Core Solutions (CORE), headquartered in Wayne, Pennsylvania, is an emerging leader in providing Electronic Health Records solutions to the behavioral healthcare/human services industries, a \$135 Billion market. CORE's innovative technology platform has transformed its client businesses allowing them to save over \$21 Million annually, and achieve a 98% acceptance rate in their claims processing. CORE believes the key to successful implementation of EHR solutions is aligning people and process with technology. Apart from offering a strong technology platform, CORE's professional services team helps customers realign processes to take advantage of new technologies. The results are improved quality of care and increased financial performance.

Technology is a key enabler for our customers and a key focus for the company. The current technology infrastructure is based on Microsoft .NET 4.0 with ASP.NET/ VB.NET, JQuery and SQL Server 2008 for the database backend. The adoption of new technologies is a constant endeavor to make sure we are quick to respond to changing market needs.

We are seeking a highly skilled Senior ASP.NET/VB.NET developer with a strong background in building scalable, predictable, high-quality and high-performance web applications on the Microsoft technology stack. As a Senior Developer, you will be responsible for building and maintaining internal and external-facing web applications. This person will work with a team of experienced analysts, developers and business resources to build highly-performing enterprise systems that improve clinical outcomes and increase staff productivity and financial performance.

- Build new systems with .NET 4.0 / ASP.NET / VB.NET / SQL Server 2008 / WCF Web Services / WCF Data Services .
- Develop new functionality on our existing software products.
- Lead/mentor developers and share knowledge through knowledge-sharing presentations.
- Participate in a small, experienced, energetic team on a rapid, agile development schedule.
- All other responsibilities as assigned

### Skills / Attributes Required

- Six(+) years experience as a developer (lead developer would be a plus).
- Three(+) years experience with ASP.NET/VB.NET.
- Two(+) years working with SQL Server (2005/2008 preferred).

- Solid understanding of object-oriented programming (OOP) and computer science foundations, such as memory management and low-level algorithm performance.
- Deep knowledge of the .NET 3.5/4.0 Framework, including Visual Studio 2008, VB.NET, ASP.NET, ASMX and WCF Web Services, and ADO.NET.
- Strong knowledge of software implementation best practices.
- Strong experience designing and working with n-tier architectures (UI, Business Logic Layer, Data Access Layer) along with some experience with service-oriented architectures (SOA).
- Ability to design and optimize SQL Server 2008 stored procedures.
- Experience with JQuery or similar technologies.
- Ability to adapt quickly to an existing, complex environment.
- Ability to quickly learn new concepts and software is necessary.
- Candidate should be a self-motivated, independent, detail oriented, responsible team-player and exhibit exceptional relationship management skills.
- Passionate about building high-quality systems with software implementation best practices while leading and mentoring a team of developers.

**Education:**

- Bachelor's degree in Computer Science, Software Engineering or a related area is preferred.
- Microsoft certifications are a plus.
