## TESTING ENVIRONMENTS

We are planning to measure the test results using production environments as recommended by the ONC.

## STANDARDS UPDATES (INCLUDING STANDARDS VERSION ADVANCEMENT PROCESS (SVAP) AND UNITED STATES CORE DATA FOR INTEROPERABILITY (USCDI))

Core Solutions Is not planning to make any version updates on approved standards through the SVAP process.

Standard (and version)	N/A
Updated certification criteria and associated product	N/A
Health IT Module CHPL ID	N/A
Method used for standard update	N/A
Date of ONC ACB notification	N/A
Date of customer notification (SVAP only)	N/A
Conformance measure	N/A
USCDI updated certification criteria (and USCDI version)	N/A

## Care Setting(s)

These measures were evaluated in multiple ambulatory organizations that used Cx360 during the reporting period.

## \$170.315(b)(1) Transitions of care and \$170.315(h)(1) Direct Project

**Description of the measurement/metric:** Measure how many C-CDAs are successfully generated in the system and sent over to the receiving third party system over the measurement period.

This criterion will be measured using both Cx360 reporting/auditing capabilities along with user community surveys.

**Associated certification criteria:** 170.315 (b1) Transition of Care and 170.315, (h1) Direct Project

**RELIED UPON THIRD PARTY SOFTWARE :** (B.1, H.1): MaxMD

**Outcomes:** We measured 9,746 successful Patient Summary C-CDA generation during the testing period. All 9,746 C-CDA records were successfully transmitted to the Health Information Exchange (Third Party). The messages were exchanged using VPN point to point tunnel and webservice, Direct Protocol was not used in these transactions. Successful acknowledgements were received for all the transmitted C-CDAs. A sample of 10 C-CCDA were analyzed for vocabulary code sets and technical standards. The sample set met all the vocabulary code sets and technical standards of a well forms CCDA. Upon surveying the user community, it was recorded that utilization of direct edge protocol to communicate with third party has been minimal.

**Challenges Encountered:** N/A

## §170.315(b)(10) Electronic Health Information

---

**Description of the measurement/metric:** Measure how many successful Patient Data export was done during the testing period for Single Patient Export and for a Patient Population

This criterion will be measured using both Cx360 reporting/auditing capabilities along with user community surveys.

**Associated certification criteria:** 170.315 (b10) Electronic Health Information

**RELIED UPON THIRD PARTY SOFTWARE :** (B.10): COREPOINT 6.0

§ 170.315(b)(10) EHI export – Single patient EHI export

(i)(A) Create an export file (i)(B) Execute at any time (i)(C) Limit ability of users who can create export (i)(D) Electronic and computable format

**Outcomes:** We measured 113 successful data export during the testing period. All 113 records were successfully exported. A sample of 5 exports were analyzed for vocabulary code sets and technical standards. The sample set met all the vocabulary code sets and technical standards of a well formed exports.

Authorized users were able to share EHI using the export capability.

Upon surveying the user community, it was recorded that utilization of EHI Single patient exports has been minimal.

**Challenges Encountered:** N/A

§ 170.315(b)(10) EHI export – EHI export – Patient population EHI export (i)(A) Create an export file

**Outcomes:** We measured 76 successful data export during the testing period. All 76 records were successfully exported. A sample of 5 exports were analyzed for vocabulary code sets and technical standards. The sample set met all the vocabulary code sets and technical standards of a well-formed exports.

Authorized users were able to share EHI using the export capability.

Upon surveying the user community, it was recorded that utilization of EHI patient

population exports has been minimal.

**Challenges Encountered:** N/A

## §170.315(c)(1)(2)(3) Clinical quality measures (COMs)

**Description of the measurement/metric:** Measure how many eCQM measures were successfully reported by organizations using the certified EHR Cx360 to CMS during the Quality reporting period.

This measure will be measured using both Cx360 reporting/auditing capabilities along with user community surveys.

**Associated certification criteria:** 170.315 (c)(1)(2)(3) Clinical Quality Measures (COMs) 165v5

**RELIED UPON THIRD PARTY SOFTWARE :** (C.1-C3): COREPOINT 6.0

**Outcomes:** During the measurement period we used synthetic data and simulated test scenarios in a mirrored production environment.

## §170.315(g)(7)(9) Application access and 170.315(g)(10) Standardized API for Patient and Population Services

**Description of the measurement/metric:** Measure how many different systems connects to Cx360 using the API

This measure will be measured using both Cx360 reporting/auditing capabilities along with user community surveys.

**Associated certification criteria:** 170.315 (g) (7)(9) Application Access and 170.315(g)(10) Standardized API for Patient and Population Services

**RELIED UPON THIRD PARTY SOFTWARE :** (g)(10) Health Samurai Aidbox FHIR API module

**Outcomes:** Upon surveying the user community Cx360 API components were not used during the measurement period. User community indicated that in they have plans to use the Cx360 API components in future. During the measurement period we used synthetic data and simulated test scenarios in a mirrored production environment.
