## **Core's User-Friendly Design and Configurability Makes Cx360 Platform of Choice for Alternative Family Services**

**February 28, 2017 -- King of Prussia, PA** – After nearly two years of research, Alternative Family Services (AFS) announced the selection of Core Solutions, Inc., a leader in providing Electronic Health Record (EHR) software to the health and human services industry, to configure and implement Cx360, an enterprise Electronic Health Record platform.

AFS—a foster, adoption and mental health agency—upholds a commitment to building sustainable relationships surrounding children and youths in and out of foster care through four distinct, accredited areas of service:

- Foster Services
- Adoptions
- Mental Health Services
- Services to Transition Aged Youth

“We currently have 6 different systems for managing clients and our program tracking and reporting needs. Cx360 will allow us to track clients across programs, better integrate our services and, most importantly, allow direct line staff to effectivity work in the field and spend more time with clients and less time filling out paperwork,” said Jeff DuBois, Director of Special Projects for AFS.

“At Core Solutions, we recognize that usability is a major factor in driving the adoption and meaningful use of EHR systems,” said Ravi Ganesan, President and CEO of Core Solutions. “We are thrilled that AFS has acknowledged Cx360’s ease of use and has entrusted Core to partner with them to help further their business needs and continue to provide better care for children and their families.”

### **About Core Solutions, Inc.**

Core Solutions, Inc. (Core) is a progressive leader in providing Electronic Health Records software to government, non-profit and commercial entities in the health and human services industry. Core is a mission driven organization with the goal of improving the lives of individuals and families receiving behavioral health services through better technology.
