Transforming the Behavioral Health Experience
Improving the Provider and Client Relationship

Core Solutions Receives ONC-ACB Complete EHR Ambulatory Meaningful Use Stage 2 Certification by Drummond Group

Core Demonstrates Further Commitment to the Health and Human Services Industry by Achieving Complete Certification of their Core Cx360 Version 6.0 Electronic Health Record

(King of Prussia, PA) -- [Core Solutions, Inc. \(Core\)](#) the progressive leader in integrated behavioral health Electronic Health Records (EHR) that transform the behavioral, medical and social services experience announced today that their EHR, [Core Cx360](#), has been tested and certified by Drummond Group for Complete Ambulatory Meaningful Use Stage 2. This Cx360 EHR is compliant in accordance with criteria adopted by the Secretary of the U.S. Department Health and Human Services.

“We are pleased to announce that our Complete Meaningful Use Stage 2 certification will assist members of health and human services community to achieve Meaningful Use and in return improve client care,” says [Ravi Ganesan, President and CEO of Core Solutions](#). “Achievement of complete certification of Core Cx360 represents our continued commitment to our behavioral health customers as we support them in achieving meaningful results.”

[Drummond Group’s](#) ONC-ACB certification program certifies that EHRs meet the Meaningful Use criteria for either eligible provider or hospital technology. As a component of the federal government’s push to improve clinical care delivery providers must demonstrate meaningful use of their EHR technology in order qualify to receive federal stimulus monies. Additionally, EHR technology can be certified either modularly or completely. In order for an EHR to achieve complete certification it would have to meet all certification criteria set by the government rather than just one criterion which would result in a modular certification. The advantage in a complete certification will result that a provider can apply for Meaningful Use with just one EHR technology, instead of having to use a variety of other products in order to achieve a complete certification.

Core Cx360 EHR, has met the requirements for ACB Complete EHR Ambulatory Meaningful Use Stage 2 Certification. Core’s Integrated Behavioral Health EHR platform, Cx360, allows for the improvement of the provider, consumer and payer relationship through increased consumer-centric collaboration which results in improved outcomes. This is accomplished through our ability to simplify the end-to-end behavioral health experience, deliver integrated care coordination, improve consumer engagement and streamline accurate provider reimbursement.

[About Core Solutions, Inc.](#)

Core Solutions is the progressive leader in transforming the behavioral, medical and social services experience for behavioral health providers, consumers and state agencies. Core’s Integrated Behavioral Health EHR platform, Cx360, allows for the improvement of the provider, consumer and payer relationship through increased consumer-centric collaboration which results in improved outcomes. This is accomplished through our ability to simplify the end-to-end behavioral health experience, deliver integrated care coordination, improve consumer engagement and streamline accurate provider reimbursement.
