## HealthWest selects Core Solutions' Cx360 as Technology Foundation for Providing Integrated Health Care

King of Prussia, PA –Core Solutions, Inc. announced the expansion of their customer base in Michigan with the addition of its newest partnership, HealthWest. HealthWest will soon implement Core's integrated Electronic Health Record (EHR), a decision that came after a six-month search yielded top scores on interface, functionality and commitment to customer service by Core.

"Among all of the positives, one of the main features our users were impressed with is the interface and the "one stop shopping" format Cx360 provided," said HealthWest's Chief Information Officer, Dave McElfish.

As the newest HHS/BH focused EHR available, Core Solutions' Cx360 offers a completely integrated and state-of-the-art enterprise EHR technology platform that is equipped to deliver and incorporate all 'big company' functionalities that organizations will require as the future of HIT and care delivery mandates evolve.

"Over the last 50 years, HealthWest's vision has been set on building a healthier, more informed and inclusive community through innovation and collaboration. At Core Solutions we share a similar vision; it is because of this that we are eagerly looking forward to our partnership with HealthWest," said Ravi Ganesan, CEO and President, Core Solutions. "We are very much looking forward to aiding HealthWest in their journey to become a leader in integrated health care and we believe that Cx360 will help them in their process towards greatness."

### **About Core Solutions, Inc.**

Core Solutions, Inc. (Core) is a progressive leader in providing Electronic Health Records software to government, non-profit and commercial entities in the health and human services industry. Core is a mission driven organization with the goal of improving the lives of individuals and families receiving behavioral health services through better technology.
