

Core Solutions Expands Partnerships in Ohio Signs Newest Customer, Woodland Centers, Inc.

October 19, 2016 - King of Prussia, PA – Core Solutions, Inc., a progressive leader in providing Electronic Health Records software to government, non-profit and commercial entities in the health and human services industry, announced the expansion of their footprint in Ohio with its newest customer, Woodland Centers, Inc. Core’s integrated Electronic Health Record (EHR) will add a new level of flexibility in data collection, reporting and increased business efficiency for Woodland Centers, a community behavioral health agency that serves Southeastern Ohio.

“After targeting our search for the last six months, we found a lot of EHRs provided well rounded features,” said Kevan Mock, Executive Director, Woodland Centers, Inc. “What set Core apart from the rest was an eagerness to build a relationship and mold what they do to help my agency do what it does.”

As the newest HHS/BH focused EHR available, Core Solutions’ Cx360 offers a completely integrated and state-of-the-art enterprise EHR technology platform that is equipped to deliver and incorporate all ‘big company’ functionalities that organizations will require as the future of HIT and care delivery mandates evolve.

“We are very pleased that Woodland Centers has entrusted us to become an integral part of their daily mission to make a positive difference in the lives and communities that they serve,” said Ravi Ganesan, CEO and President, Core Solutions.
