Over the past several years, 24 states have initiated the process of transitioning I/DD provider services to managed care systems. The scope of these changes has varied from state-to-state, but in many instances, the impact on I/DD providers has been traumatic. Some providers in those states did not survive the transition.

The New York I/DD Futures Forum program offers the latest information to help executive teams address these new challenges and develop effective strategies to successfully transition to the revised New York State I/DD MCO model.
