

# .NET Developer Job Description

We are seeking a highly skilled ASP.NET/MVC/C# developer with a strong background in building scalable, predictable, high-quality and high-performance web applications on the Microsoft technology stack. As a developer, you will be responsible for building and maintaining internal and external facing web applications. This person will work with a team of experienced analysts, developers and business resources to build highly-performing enterprise systems that improve clinical outcomes and increase staff productivity and financial performance.

- Build new systems with .NET / ASP.NET MVC / C# / SQL Server / WCF / REST
- Develop new functionality on our existing software products.
- Lead/mentor developers and share knowledge through knowledge-sharing presentations.
- Participate in a small, experienced, energetic team on a rapid, agile development schedule.
- All other responsibilities as assigned

## Requirements Skills / Attributes Required

- Three (+) years' experience as a developer (lead developer would be a plus).
- Three (+) years' experience with .NET / ASP.NET MVC / C# / VB.NET / SQL Server 2016/ WCF / REST
- Three (+) years working with SQL Server (2012/2016 preferred).
- Solid understanding of object-oriented programming (OOP) and computer science foundations, such as memory management and low-level algorithm performance.
- Deep knowledge of the .NET Framework, including Visual Studio, VB.NET, ASP.NET MVC, WEBAPI, Micro Service Architecture, WCF Web Services, REST, JSON and ADO.NET.
- Strong knowledge of software implementation best practices.
- Strong experience designing and working with n-tier architecture (UI, Business Logic Layer, Data Access Layer) along with some experience with service-oriented architectures (SOA).
- Ability to design and optimize SQL Server stored procedures.
- Familiarity with AWS DevOps pipeline is a huge plus.
- Ability to quickly learn new concepts and software and adapt to an existing, complex environment.
- Candidate should be a self-motivated, independent, detail oriented, responsible team-player and exhibit exceptional relationship management skills.
- Passionate about building high-quality systems with software implementation best practices while leading and mentoring a team of developers.

## Education:

- Bachelor's degree in Computer Science, Software Engineering or a related area is preferred.
- Microsoft certifications are a plus

At the current time, we are not accepting any resumes from consulting firms for corp to corp. Only serious individuals representing themselves should apply.
